INCI declaration
Phenoxyethanol, methylparaben, ethylparaben, butylparaben, propylparaben

Iscaguard FPX2 is a blend of paraben esters in phenoxyethanol. With high efficacy, a broad spectrum of activity and wide pH use range, Iscaguard FPX2 is the perfect choice for many personal care applications.

In Use Concentrations	ISCA recommendation	EU Cosmetic Regulation (max)
Leave-on	0.3 – 0.8 %	1.38 %
Rinse-off	0.3 – 0.8 %	1.38 %

# Not to be used in leave-on products designed for application on the nappy area of children under 3 years of age. Leave-on products designed for children under 3 years of age must be labelled “Do not use on the nappy area”.

In use concentrations vary according to the formulation type and other ingredients present. The correct use dosage should be determined by microbial challenge testing of the finished formulation (ISCA UK offers discounted challenge testing to our customers).

Formulation guidelines	
pH (effective range)	3 – 8
Solubility (Water)	0.5 %
Solubility (Glycols)	Miscible
Maximum Process Temperature	80 °C
General information	Iscaguard FPX2 is compatible with most personal care ingredients. The presence of phenoxyethanol reduces, or overcomes the inactivation of parabens by some non-ionic emulsifiers when parabens are used alone. In formulations with a high protein content, it may be necessary to use a higher concentration of Iscaguard FPX2. Not to be used in leave-on products designed for application on the nappy area of children under three years of age.
